How meridia works:

MERIDIA works by acting on the appetite control center in the brain. Studies have shown that using MERIDIA, along with a reduced-calorie diet and exercise, helped patients lose weight and maintain weight loss for up to two years.

The active ingredient in MERIDIA, sibutramine, works in the area of the brain that signals the sense of fullness (satiety). Meridia does not suppress appetite, which is your signal to start eating.

Meridia blocks the re-uptake of the brain chemicals (serotonin and norepinephrine) which help regulate the sense of fullness. Fullness is your signal to stop eating. Having a sense of fullness, or satiety, means you may feel satisfied with less food.

Sibutramine should be used in conjunction with a reduced calorie diet. Always consult your physician before beginning any diet or exercise program.

Clinical Experience

Sibutramine, the active ingredient in MERIDIA, has been extensively studied throughout the world. It has been studied in more than 100 clinical trials involving more than 12,000 patients. Approximately 14 million patients in more than 75 countries have used sibutramine for the treatment of obesity since it was approved in 1997.4

In studies, sibutramine in combination with diet and exercise was effective in producing and maintaining significant weight loss in the majority of obese patients compared to diet and exercise alone.2

Success stories:

Jenna - Connecticut

"Growing up, I was never over weight. In fact I was very athletic and fit. After the birth of my first child I gained over 100 pounds. It took only a year and I worked it all off, (without phentermine). After the birth of my second child I gained weight again. But I only lost half of the weight. By the time my third baby was born I had gained an additional 110 pounds. I never even saw it coming. Suddenly, I was **299.8 pounds**. And I certainly wasn't athletic or fit. So, I got into the Weight Watchers program. I couldn't find a doctor that thought I needed Meridia or any other weight loss aide..."

Heather - Texas

Heather's story is one of amazement. By cutting down on her food intake and including constant workouts to her regime, together with the help of Phentermine she has managed to lose over a 100 lbs in one year. Needless to say, Heather is a new person taking on a new lease of life! "With workout regimes and constantly watching what I ate, and cutting out supper I **lost 115 lbs in a year!!!!** With Meridia I was never hungry, and sometimes I HAD to make myself eat...."

Mary

"When my doctor told me, at the age of 37, that my cholestrol was nearing a point of concern I took a good look at myself and my lifestyle and knew something had to be done if I was going to live a long and healthy life. Thanks to Meridia, I got the jump start I needed. Only after a few weeks of taking Meridia and incorporating excercise in my daily routine, I immediately began to see a difference. The amazing thing is... exercise works even better while reducing your calorie intake and the results are shocking..."

Brian - Canada

"I look back now and wonder how did I ever let myself get so **fat**? I come from a family genetically disposed to being overweight. But not me. I was always slim, muscular, athletic and in great physical condition. My one bad habit - smoking. At age 42, I had a physical and a chest x-ray because I was having discomfort breathing. Years prior, I had a spontaneous pneumo thorax and thought that I would just play it safe..."
